San Luis Potosí, México

Accomplished Full Stack Web Developer with 3+ years of progressive experience specializing in high-impact frontend architecture, resilient backend microservices, and robust full-stack integration. Driven by Clean Code principles, SOLID architecture, and optimal user experience (UX) to build highly scalable, performance-optimized web applications within Agile SCRUM environments. Deeply proficient across modern ecosystems (Vue/Nuxt, React/Next.js, Node.js, Laravel) with a strong plus in leveraging AI-driven tools like Claude Code, MCP, and RAG pipelines to accelerate software delivery cycles.

Employment

Leadventure

2025-02 - 2025-11

Frontend Developer

Remote

- Successfully created and launched over 50 fully responsive websites from provided design specifications, applying Clean Code standards to guarantee long-term maintainability and optimal cross-device UX.
- Led the end-to-end content migration process from legacy client websites to the new platform, building custom Python and Bun-driven scripts to automate transfer pipelines while guaranteeing total data integrity.
- Developed multiple internal web tools and integrated Claude Code workflows that streamlined the site styling architecture, resulting in a marked increase in frontend engineering delivery speeds.

D4T Technologies

2024-01 - 2025-02

Full Stack Web Developer

San Luis Potosí

- Played a key role in delivering a scalable and resilient full-stack microservice architecture, ensuring seamless cross-platform communication and solid API contract alignment across systems.
- Enhanced user satisfaction and frontend performance by optimizing responsive Nuxt application components, enforcing SOLID principles, and minimizing runtime technical debt.
- Supported long-term project planning and roadmap execution by applying Specification-Driven Development (SDD) alongside modern AI integrations like MCP servers and RAG pipelines to augment platform capabilities.

Fyware

2022-06 - 2023-06

Full Stack Web Developer

San Luis Potosí

- Facilitated seamless data exchange and integration by designing, implementing, and consuming secure RESTful APIs structured around clear Clean Architecture guidelines.
- Accelerated comprehensive web application completion by collaborating across multiple technology stacks (.NET, Python, Node.js) and optimizing complex relational and non-relational database models.
- Contributed to the successful launch and lifecycle maintenance of multiple full-stack web applications by planning, testing, deploying, and maintaining core features to ensure high availability.

Skills

Frontend

HTML5 CSS3 JavaScript TypeScript Vue.js Nuxt React Next.js Pinia Tailwind CSS Sass/SCSS Bootstrap

Backend

Node.js Express.js Bun PHP Laravel Python Java Kotlin .NET/C# Sequelize Prisma PostgreSQL MySQL MongoDB Redis ORM SQL

Software Eng.

Clean Code & SOLID Principles Clean Architecture Docker AWS GIT Restful API Microservices CI/CD Unit Testing Agile SCRUM Linux Claude Code / OpenCode MCP / RAG SDD / TDD Harness Engineering

Soft Skills

Technical Leadership Analytical Problem Solving Rapid Adaptability Team Collaboration Project Ownership Workflow Automation Attention to Detail Performance Resilience

Education

IT Engineer

2018-08 - 2023-12

Universidad Politécnica de San Luis Potosí

San Luis Potosí, S.L.P.

Graduated with academic excellence. Recipient of the national CENEVAL Award for Excellence in EGEL Performance (Software Engineering), recognizing top-tier mastery of disciplinary and transversal skills in complex, real-world scenarios.
